

Checklist For When More Than 5% Supervision May Be Warranted

Please consider the following scenarios as guidelines for when it may be necessary to increase supervision, keeping in mind there may be additional scenarios not included below.

- ☐ Case involves multiple challenging behaviors or severe behaviors posing safety risks
- ☐ Client has medical complications or comorbid conditions requiring specialized monitoring
- ☐ Team is implementing new or complex behavior intervention plans
- ☐ RBT is in the initial training period or new to the case
- ☐ There are multiple RBTs assigned to the case
- ☐ Recent changes in client medication that may affect behavior or treatment response
- ☐ Case involves crisis intervention protocols or restraint procedures
- ☐ Client is not making expected progress despite consistent implementation
- ☐ Client is experiencing a transitional period (changing settings, significant life events)
- ☐ Client has limited communication abilities
- ☐ Case requires coordination with multiple service providers or systems of care
