| BT/RBT: | BCBA: |

| Implementation | Yes-No-N/A |
|---|---|
| BT/RBT sets timer for appropriate interval length. | |
| BT/RBT ensures that all materials are set up prior to the session beginning. | |
| When applicable, BT/RBT ENDS INTERVAL at appropriate time/Gives reinforcement at appropriate time. | |
| When applicable, BT/RBT gives APPROPRIATE/DESIGNATED REINFORCERS at the end of the interval. | |
| When applicable, BT/RBT gives reinforcement based on the ABSENCE OF THE TARGETED MALADAPTIVE BEHAVIOR. | |
| When applicable, BT/RBT restarts interval when the targeted maladaptive behavior occurs. | |
| BT/RBT reinforces other behaviors at satisfactory/designated rate. | |
| BT/RBT reinforces other behaviors with satisfactory/designated reinforcers. | |
| BT/RBT collects accurate data on the occurrence and absence of the negative behavior. | |
| BT/RBT's reinforcement application is satisfactory and within determined amount of time. | |
| BT/RBT demonstrated ability to properly refrain from reinforcing behavior (e.g. in instances of ignoring attention seeking behavior, the tech effectively ignores and does not engage) | |
| Scoring instructions: count total number of "Y" and "N" (exclude any N/A) then take the total number of "Y" and divide by the total number of items that scored either Y/N and multiple by 100.<br><br>(Y/ (total y/n responses)) * 100 | |
